## MEMORANDA.

**Trade.**—The oversea imports during March were valued at £2,301,521, which shows an increase of £319,684, or over 16 per cent., as compared with the corresponding month of last year. The total for the three months was £6,420,529, an increase of £1,056,596, or over 19 per cent. over the corresponding figures for 1910. There were increases in most of the principal articles—apparel and soft goods, iron and steel, metal manufactures, machines and machinery, and timber.

The oversea exports for March amounted to £2,946,562, being a decrease of £98,395, compared with the corresponding month of last year. For the three months there was a decrease in the oversea exports of £937,676, or over 10 per cent., as compared with last year.

Principal increases during the three months were—					£

Minerals	...	...	...	...	441,142

Principal decreases during the same period were—					
Wool ...	...	...	...	...	1,374,025
Other Pastoral Produce	...	...	...	...	24,815
Wheat and Flour	...	...	...	...	120,196

Separating merchandise from gold, the exports of the former during the three months decreased by £785,367, and the latter by £152,309.

**Imports at Sydney.**—Excluding the value of the imports from State ports, the articles imported at the port of Sydney in March were valued at £2,893,456. The following is a summary of the imports during the month :—

	Weight.		Measurement.	Value.
	tons.		tons.	£
Imports Oversea ... ..	47,806	86,933	2,204,486

A few special articles, denoted by number in the detailed table within, have been converted into weight or measurement, and are included in the above statement. During the three months ended March, 1911, the oversea imports were valued at £6,183,799, and the Interstate imports at £2,138,081, the total of the two being £8,321,880.

**Public Finances.**—The Public Accounts for March show that the net revenue for the month was £1,016,324, or £283,222 less than in March of last year. During the nine months ended 31st March, the revenue was £10,549,101, being £328,307 more than the corresponding period of the last financial year.

Principal increases during the nine months were— £

„ Lands	... ..	142,474
„ Taxation	... ..	86,945
„ Sydney Harbour Trust	...	29,302
„ Water and Sewerage Rates	...	15,157

The only item to show a decrease of more than £8,000 was “Commonwealth Returns,” which were £614,918 less than for the corresponding nine months of last year.

The expenditure during March was £1,662,346, an increase of £167,573, as compared with March of last year. During the nine months the expenditure was £10,665,349, being £689,304 more than in 1909–10.

Principal increases during the nine months were— £

Business Undertakings	... ..	383,924
Government Departments	... ..	159,300
Interest Repayments	... ..	160,828

Sinking Fund and Redemption Payments show a decrease of £14,748.

On the 31st March, 1911, the Consolidated Revenue Account was in credit to the amount of £786,785.

**Agricultural Production.**—The preliminary results of the final compilation of the crop returns show that the yield of wheat during the 1910–11 season was 27,709,360 bushels from 2,117,027 acres, equivalent to an average of 13·09 bushels to the acre. This yield is the second largest on record for the State, being only exceeded by the figures for the years 1909–10 by about 823,000 bushels; and the average yield per acre is over 2 bushels better than the mean for the previous ten years. The present figures show that the estimate made in December last has been exceeded by about 4,250,000 bushels, but this disparity has been accounted for by an increased grain area of 105,000 acres and by a better average return per acre than was anticipated in the south-western slope and Riverina divisions.

**Gold Production.**—The gold yield during March was 13,802 oz. crude, equal to 10,754 oz. fine, valued at £45,681. The value of gold produced during the three months was £178,785, and showed a decrease of £38,610 compared with the corresponding period of 1910.

**Prices.**—The general index number for March was below that of February, and also lower than for the corresponding month of last year. The index number for pastoral produce was 1,187, and for metals 1,144, and for all articles 1,158. Prices generally were below those ruling in February, although wool, both greasy and scoured, and silver, showed slight increases on the figures ruling in the previous month. The principal articles to show decreases were butter, wheat and flour, sheep-skins, hides, copper, lead, and tin.

**Land Selections.**—During March 94 new settlers applied for 61,616 acres; and 11,579 acres, representing 32 blocks, were set apart for residential settlement. Since the beginning of the year, the number of new settlers has been 364, and the area applied for 261,593 acres. The original area set apart for residential settlement since the 1st January has been 156,324 acres, representing 235 blocks.

**Meteorology.**—During March light to heavy rains, the result of storms were experienced almost throughout the State, but unlike the weather conditions ruling in January and February, the totals recorded were generally below the average. In the central portions of the Northern areas and in the Wilcannia, Menindie and Broken Hill districts the shortages were considerable. The most favoured districts were the Southern border, Southern tableland, South Coast, and portions of the south-west slope and Central tableland. During the second week of the month very heavy rains, with squalls, occurred on the Southern portions of the Central and Northern Coast, and were the means of causing considerable damage to property, the falls registered at some of the stations being exceptionally high.

**Vital Statistics—Sydney and Suburbs—March, 1911.**—The Births registered numbered 1,524, equal to 28·92 per 1,000 of population; of the total, 770 were males and 754 females. The rate is satisfactory, being the highest for the month of March for the past ten years.

The total Deaths numbered 503, namely, 266 males and 237 females, equal to a rate of 9·60 per 1,000 of population, being the lowest for the month of March since 1907.

The Infantile mortality was 70 per 1,000 births, and was 26 per cent. below the average for the month during the last decennium.

**Fruit-growing Industry.**—Comparative tables Nos. 57 to 60 show the progress which the fruit-growing industry has made during the past ten years. A slight decrease in acreage is manifested, but the retrogression is more apparent than real, as in the earlier years numbers of old and neglected orchards, which have since been destroyed, were included in the returns. The subdivision of large areas for building purposes is also an important factor in the diminished acreage. The monetary return, however, shows unmistakably that the general condition of the orchards has been much improved by the cutting-out of the old and diseased trees and the net value per acre of productive trees has steadily increased.

Particulars respecting the numbers of the various kinds of fruit-trees are published for the first time, and for the year 1909-10 the areas of citrus and other fruit (productive and unproductive) were based on the number of trees. Under the system previously in vogue, there is no doubt that in mixed orchards some of the area devoted to citrons was included with other fruits, and also that a proportion of the unproductive area was returned as productive.
